HW 3 Grading Guidelines

Total Points: 5

You may not use any special tools to create your pages. Graders will view the source code and verify that you wrote the HTML and CSS directly.

1. Layout – 2 points: All components (text, font, borders) are properly placed.
2. Font style, size and color – 1 point: if there is no big difference from the PNG image snapshots, you get 1 point for each component.
   The grader will load your page(s) using the Firefox browser and set the page to the same size as the PNG images in the assignment's description.

3. CSS – 1 point: Layout uses CSS to imitate page as closely as possible, including vertical scrolling and background images.
4. Floating top – 1 point: During scrolling, the site needs to "float" on top of the large background image (Cutlery.png).

   IMPORTANT
   - Using "Frames" and/or "cropped" images (using tools like Photoshop) will result in a 5-point penalty.
   - Making the site non-static or responsive, will incur a 1-point penalty.
   - These grading guidelines are provided for your guidance. If any issue is not explicitly covered, you may discuss it on Piazza.
